OF ACTIVITY MADE FOR LOADS OF FUN GREAT PROP THROUGHOUT CONTEST. VERY POLITE COMPETITORS... ENJOYABLE. IS MY FIRST RTTY WPX IN MANY YEARS AND FUN!! ALSO THE FIRST THAT I MISSED THE FEBRUARY ORLANDO HAMFEST....**NE3H**. by club members, WB4LNM and his wife and KE4COL and his son. contest with good club participation. The Tenedyne Log: antenna worked flawlessly and the 15 meter opening on Sunday great. not do as well as last year, but we lost Darrell, this

year. Darrell passed away late last year and he was on 40 meters. Darrell started NN4MM (EALA DX CLUB) a few ago and we have revived the callsign. We will use it as often as . for all of the contacts and repeats....**NN4MM**. was a TOTALLY REMOTE effort in that NO OPERATORS were operating the shack during the contest. A technical glitch prevented us using more than two operating positions but this could not be while the contest was in progress. Thanks to W5ODJ for repairing and upgrading our vital Internet connection. It flawlessly. Position 1 used a VPN, VNC Viewer, Mumble audio, Commander and N1MM Logger Classic. Position 2 was operated only John-K3TN who used a K3 connected through a RemoteRig box. He to work around an audio problem and should solve it once, a board from Elecraft for his K3-mini arrives. Conditions were and our score would have been substantially higher, had we the full complement of operating positions available. Next time. was pretty slick to operate from many miles away, and hear the audio and watch things happen, all remotely. (W3UL & K3TN in . W4TMO in NC. W0YR in VA. No one in the K4VV shack.) Safety allow us to meet FCC control requirements. No "runaway" during the contest. Many thanks to our hosts, Jack (K4VV) and Sharon. QSOs will be uploaded to ARRL LOTW. Thanks for the Qs and Mults. We will see you all in the ARRL CW test. the boundaries of Remote Contesting. 73
TeamK4VV....**W3UL**. time fun!....**W4SDJ**. &P only for short periods, radio took a back seat to other this weekend. All antennas used are from my motorhome collection. This could have been a very high scoring test with booms, high in the air and the full 1.5kw, oh, also more BIC (butt in chair) time. 73 had fun, Tim W6NS....**W6NS**. (op: W5AJ)....**WF5E**. glitch means my numbering started at 008....**WO7R**. got off to a slightly rocky start with the second station deciding liked the serial number 001 better than incrementing. Our to our first few Qs on 10 meters, all with number 1. After restarts on N1MM we gave up and created a new DB and then moved forward at the cost of about 30 . Propagation was great on 20/15/10m during the day; however /80mtrs was a little tougher. Thanks to all the JA?s who worked us the wee hours. There were some exotic callsigns showing up. to everyone for a wonderful contest. Besides propagation had the other main ingredients of a great contest, a great time and team and we ate really well thanks to N7BV?s wife, . 73,....**WR5J**.
